CADAVER LAB

ICLO VERONA

Teaching and Research Center
Via Evangelista Torricelli, 15/A
Verona (VR)

An educational course of
Villa Bella Clinic | Salò

This year, we made the decision to completely redesign the format of our course. After many years of welcoming 300-350 participants, we have chosen to limit the group to just 80.

Our goal is to ensure that each attendee has the opportunity to truly master the techniques of lifting and blepharoplasty in depth. To this end, we have structured the course so that participants remain together at all times, creating an environment where each of them can freely raise questions and engage directly with the instructors. The program will cover the different lifting techniques—focusing in particular on the two most widely practiced—so that every participant can make an informed choice about which approach best suits their own practice, taking into account both ease of execution and the potential risks involved.

The first day of the course will take place in the anatomy lab of Verona.

Each participant will have the opportunity to perform a facelift and a blepharoplasty in every detail. Participants will be guided step by step by the instructors, who will explain each technical aspect until the procedure is completed, addressing any questions related to the different stages.

On the second day, Saturday, the morning will be dedicated to live surgery, with two facelifts and one blepharoplasty. In the afternoon, a series of lectures will highlight the key details that enable these procedures to be performed with maximum effectiveness.

The third day, Sunday morning, will feature further live surgical cases, while the afternoon will conclude with presentations, lectures, and a special 'surgical speed date'. During this session, each participant will meet directly with a faculty member to clarify any remaining questions or uncertainties, and to learn how different surgeons have addressed the challenges that surgical practice often presents.

FACULTY

Chiara Botti - Italy

Giovanni Botti - Italy

James Grotting - USA

Mario Pelle Ceravolo -Italy

FRIDAY, OCTOBER 3

Full Day Cadaver Lab in ICLO Verona

07:30 Departure from the hotel with bus
