Verona (VR)

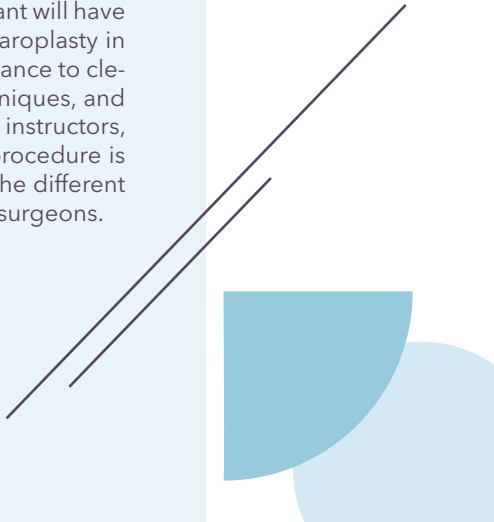

WELCOME

Since last year, we have made the decision to completely redesign the format of our course. After many years of welcoming 300-350 participants, we have chosen to limit the group to just 80. Our goal is to ensure that each attendee has the opportunity to truly master the techniques of lifting and blepharoplasty in depth. To this end, we have structured the course so that participants remain together at all times, creating an environment in which everyone can freely ask questions and engage directly with the instructors. The program will cover the different lifting techniques, focusing in particular on the two most widely practiced, so that every participant can make an informed choice about which approach best suits their own practice, taking into account both ease of execution and the potential risks involved.

On the first day, **Friday, Oct 2**, the morning will be dedicated to live surgery, with two facelifts and one blepharoplasty. In the afternoon, a series of lectures will highlight the key details that enable these procedures to be performed with maximum effectiveness.

On the second day, **Saturday, Oct 3**, the morning will feature further live surgical cases, while the afternoon will conclude with presentations, lectures, and a special "surgical speed date." During this session, each participant will meet directly with a faculty member to clarify any remaining questions or uncertainties and learn how different surgeons have addressed the challenges that surgical practice often presents.

The last day of the course, **Sunday, Oct 4**, will take place in the anatomy lab in Verona, where a bus will take you from outside your hotel early in the morning. Each participant will have the opportunity to perform a facelift and a blepharoplasty in every detail. Two cadavers will be prepared in advance to clearly demonstrate the anatomy and the main techniques, and participants will be guided step by step by the instructors, who will explain each technical aspect until the procedure is completed, addressing any questions related to the different stages. There will be one specimen for every two surgeons.

R. Warren
- 16:00 My approach to the sub-mandibular gland
M. Pelle
- 16:20 Face lift complications and their management
G. Botti

16:40 *Open Coffee Break*

- 16:40 Psychological approach in facelifting
A. Canovi
- 17:10 Q & A
- 17:30-19:00 Surgical Speed Date: 20 minutes with each tutor
(groups of 20 people)

CADAVER LAB

SUNDAY 4 OCTOBER

Full Day Cadaver Lab in Verona

09:00

Anatomy on a specimen

09:30

Each participant will have the opportunity to perform the procedures demonstrated during the first two days on one side of the specimen, working progressively from the forehead down to the neck. This will allow participants to practice temporal lifts, blepharoplasty, midface lifts, cervicofacial lifts, and deep neck surgery. All dissections will be performed under the guidance and supervision of the instructors.

CADAVER LAB VENUE

ICLO VERONA

Via Evangelista Torricelli, 15A

CONGRESS VENUE

Located in the Mediterranean landscape of Salò, the A-ROSA Lago di Garda is an elegant 5-star hotel that combines contemporary design, comfort and a stunning view of the lake.

Surrounded by olive groves and the natural beauty of Lake Garda, it offers modern and refined surroundings, dedicated spaces for meetings and events, and an extensive wellness area, providing the ideal setting for moments of gathering, discussion and sharing.
